[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

Summary

Geoinformatics undergraduate skilled in full-stack development (Python, JavaScript, React, FastAPI) and applied AI/LLM engineering (LangChain, RAG, prompt engineering), with hands-on experience shipping tested, API-integrated projects end to end.

Experience

Frontend Web Development Intern

May 2026 – Present

Magnus Corps (Remote)

- Built responsive frontend layouts with semantic HTML/CSS and JavaScript-driven interactivity for the agency's client-facing marketing site.
- Helped integrate an AI-powered feature into the frontend and maintained a clear, reusable component structure aligned with the design system.
- Tech stack: HTML, CSS, JavaScript, AI integration.

Projects

SyncPad — Real-Time Collaborative Code Editor (Hand-Built CRDT)

2026

[GitHub](#) | [Live Demo](#)

- Engineered a real-time collaborative editor from scratch with a hand-built RGA CRDT engine (Roh et al. 2011), achieving strong eventual consistency across concurrent clients without server-side locking.
- Built a FastAPI and native WebSocket backend with a React/Vite frontend featuring live cursor presence and a CRDT inspector; validated with an 8-test convergence suite covering concurrent edits, 4-client convergence, and reconnect resync.
- Tech stack: Python, FastAPI, WebSockets, React, Vite, PrismJS, CRDT/RGA.

OmniSocial AI — Full-Stack Social Media Analytics SaaS

2026

[GitHub](#) | [Live Demo](#)

- Architected a full-stack creator analytics platform with FastAPI and React 19, exposing 21 REST endpoints backed by JWT authentication and 4 SQLAlchemy models, validated by a 33-test pytest suite (100% passing); integrated a pluggable platform-adaptor system across 5 live third-party APIs (YouTube, GitHub, Instagram, Reddit, Dev.to) with automatic fallback.
- Integrated an LLM-powered assistant with tiered fallback across Groq (Llama 3.3 70B) and Google Gemini, grounding responses in live user analytics; conducted a security audit hardening JWT fallback, rate limiting, and CORS handling.
- Tech stack: Python, FastAPI, React 19, Vite, SQLAlchemy, JWT, SQLite, pytest, Groq, Gemini.

LangChain Multi-Provider AI Studio & Chain Playground

2026

[GitHub](#) | [Live Demo](#)

- Built an interactive React/Vite studio unifying 5 free-tier AI providers (Groq, Gemini, OpenRouter, HuggingFace, local Ollama) behind one interface, with a zero-config client-side fallback mode and an LCEL Chain Flow Visualizer.
- Curated a prompt template library (ReAct, RAG Q&A, JSON extraction) and a Python code exporter for one-click runnable LangChain snippets, structured within a uv-managed Python monorepo.
- Tech stack: React, Vite, Python, LangChain, LCEL, Groq, Gemini API, HuggingFace, Ollama.

Technical Skills

Programming Languages: C++, Python, JavaScript, HTML, CSS, SQL

Frameworks & Tools: React, Vite, FastAPI, SQLAlchemy, Git/GitHub, REST APIs, MySQL, MongoDB

Generative AI / LLM Tools: LangChain, LCEL, Google Gemini API, Groq, Ollama, OpenRouter, Prompt Engineering, RAG (Retrieval-Augmented Generation)

Core CS Subjects: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, System Design

Education

Netaji Subhas University of Technology

2023 – 2027

B.Tech, Geoinformatics

CGPA: 6.92 / 10

Class XII (CBSE), 2023 | Class X (CBSE), 2021

Achievements

- Solved 400+ Data Structures & Algorithms problems on LeetCode spanning graphs, dynamic programming, and trees.
- Ranked within the top 20 percentile in JEE Main among 1M+ candidates.
