EDUCATION

B.Tech (Geoinformatics)	2023-2027	Netaji Subhas University of Technology	6.92/10
CBSE (Class XII)	2023	Govt. Boys Sr Sec School No.01	64.4%
CBSE (Class X)	2021	Govt. Boys Sr Sec School No.02	74.4%

INTERNSHIP

- **Magnus Corps | Frontend Web Development | Remote** [Website](#) **15 May 2026 - Present**
 - Worked alongside the **web development team** on the agency's client-facing marketing site, building **responsive frontend layouts** with semantic **HTML** and **CSS**.
 - Implemented **JavaScript**-driven interactivity and helped integrate an **AI-powered feature** into the frontend, wiring UI components to backend/AI responses.
 - Maintained a **clear, reusable component structure** across pages, ensuring consistent styling and layout aligned with the agency's design system.
 - **Tech Stack:** HTML, CSS, JavaScript, AI Integration.

PROJECT

- **OmniSocial AI: Full-Stack Social Media Analytics SaaS** [GitHub](#) [Demo](#) **2026**
 - Built a full-stack analytics platform with a **FastAPI** backend (layered architecture, SQLAlchemy ORM) and a **React/Vite** frontend with a live dashboard of metric cards and charts.
 - Implemented **JWT-based authentication** and a **SQLite** data layer; integrated the **YouTube Data API v3** as the platform's first live-data source via a reusable **PlatformConnector abstraction**.
 - Conducted a security audit of the public repository, confirming no leaked secrets and hardening JWT fallback, rate limiting, and CORS handling.
 - **Tech Stack:** Python, FastAPI, React, Vite, SQLAlchemy, JWT, SQLite, YouTube Data API v3.
- **LangChain Multi-Provider AI Studio & Chain Playground** [GitHub](#) [Demo](#) **2026**
 - Built an interactive **React/Vite** studio for testing and visualizing **LangChain** chains, unifying **5 free-tier AI providers** (Groq, Gemini, OpenRouter, HuggingFace, local Ollama) behind one interface.
 - Designed a **zero-config client-side fallback mode** for key-free testing and an **LCEL Chain Flow Visualizer** rendering the PromptTemplate → LLM → StrOutputParser flow.
 - Curated a **prompt template library** (ReAct, RAG Q&A, JSON extraction) and a **Python code exporter** for 1-click runnable LangChain snippets, structured within a **uv**-managed Python monorepo.
 - **Tech Stack:** React, Vite, Python, LangChain, LCEL, Groq, Gemini API, HuggingFace, Ollama.

ACADEMIC ACHIEVEMENTS

- Solved **400+ Data Structures & Algorithms problems** on LeetCode spanning graphs, dynamic programming, and trees.
- Ranked within **top 20 percentile** in JEE Main among 1M+ candidates.

TECHNICAL SKILLS

- **Programming Languages:** C++, HTML, CSS, JavaScript, SQL.
- **Software/Tools/Libraries:** MySQL, MongoDB, Git/GitHub, REST APIs.
- **Generative AI / LLM Tools:** LangChain, LCEL, Google Gemini API, Groq, Ollama, OpenRouter, Prompt Engineering, RAG (Retrieval-Augmented Generation).
- **CS Subjects:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management System, System Design.
